- 2. The Kontla-Jarve Combine received a Grade I premium for successful work during the first half of 1952 in supplying gas to Leningrad. For this achievement the manager of Gasworks No.1, Engineer Serebryannikov, received a special acknowledgement from the Ministry of the Shale-Chemical Industry of the Estonian SSR. On this occasion it came out that, in the Kohtla-Jarve Combine, only Gasworks No.1 is working at present. This plant has six furnace blocks, each block consisting of two half-furnaces (sic). Gasworks No.2 is still under construction.
- Two kilometers northwest of the mining town Ahtme, a group of buildings is now under construction for the Estonslanets factory school. The buildings are calculated to hold 800 students and are planned to be ready by 1 August 1953.
- 4. The Kreenholm factory (Krengolmskaya manufaktura) near Narva has been wholly restored. On 1 May 1952 the factory employed 2460 people. There were 321 students at the factory school. This factory supplies finished /textile/ goods to 194 commercial enterprises in the USSR. The manager is M. Sorokin.
